With Amplion's Advanced Messaging/Reminder Suite:

All messages appear on large screens on hall walls with name of actual staff person receiving message and time received, along with any escalations to other staff and time, for teamwork support

Messages sent change patient dome lights to enhance communications to staff

Messages can be directed to staff wireless phones of different types and the system verifies that the message was received at the phone by means of an "Acknowledge" sent back automatically by the phone.

Messages can be announced at the phone with custom sounds or even a spoken text such as "Fall Alert Room 114"

Messages sent to phones can be responded to with "Accept" or "Unable". Unable responses immediately escalate until available caregiver can be located.

REAL TIME OR LEFT BEHIND
